

J. Kobi Stern, DMD, M.Sc

Minimally Invasive Periodontal and Implant Surgery, Does it Really Matter?

- Identify the different diagnostic factors, critical to avoid and manage esthetic failures.
- Identify the most predictable surgical approach and its timing to modify and improve tissue biotype and marginal levels.
- Understand the role of Implant provisional restorations in optimizing the final esthetic outcome.
- Recognize the benefit of minimally invasive surgery on wound healing and overall esthetic outcome.
